Electronic Registration of Sales 2.0

Non-production environment (playground)
Access and operational information

Version: 1.2

Date of the last version: 11 November 2026

Document content

This document provides additional information of operational character to the information published in the document “Format and structure of registered sale information and description of the data interface for receipt of registered sale data messages v1”. The document contains information necessary for the use of the non-production environment (playground) of EET 2.0, information about the certificates used and other important operational information.

DOCUMENT HISTORY

Overview of versions

Version	Date	Description
1.0	2 June 2026	First working version of the document for EET 2.0. Planned launch of the playground for the public: by 1 July 2026.
1.1	30 June 2026	Amendment to Chapter 3.3 – change of issuing authority Amendment to Chapter 4.1 – maintenance window addition
1.2	11 November 2026	Amendment to Chapter 3.1.5 – OID change Amendment to Chapter 3.3 – supplement of certificate information

1 INTRODUCTION

1.1 RELATION TO THE DOCUMENT "Format and structure of registered sale information and description of the data interface for receipt of registered sale data messages"

This document provides additional information of operational character to the information published in the document "Format and structure of registered sale information and description of the data interface for receipt of registered sale data messages". Abbreviations and terminology defined in the document "Format and structure of registered sale information and description of the data interface for receipt of registered sale data messages" are used throughout this document. Additional abbreviations and terminology are defined in this chapter.

The document always relates to the current version of the document "Format and structure of registered sale information and description of the data interface for receipt of registered sale data messages". At the moment of publication of this version the current version is 1.0 of the document "Format and structure of registered sale information and description of the data interface for receipt of registered sale data messages".

The non-production environment (playground) will be used solely by software developers (developing software for cash registers), not by cash registers' end users. Sending a data message to the non-production environment shall not be considered sending of registered sale information as per Section 16 of the ZoET, i.e. the POK (confirmation code) returned by the non-production environment is not a valid confirmation code.

1.2 ABBREVIATIONS

This chapter contains the definition of additional abbreviations used in this document.

Abbreviation	Definition
PG	Non-production environment (playground)
CA	Certificate authority

1.3 TERMINOLOGY

This chapter contains the definition of additional terminology used in this document.

Term	Definition
Taxpayer	Subject of the registration of sales according to ZoET

2 PG ACCESS INFORMATION

2.1 URL

PG is accessible at the URL
https://pg.trzbyeet.gov.cz/eet/services/EETServiceSOAP/v4

resp. at the URL corresponding to the current version of the data interface.

The IP address corresponding to the DNS name pg.trzbyeet.gov.cz will change during PG operation; use of an IP address in the URL to access PG is not recommended.

2.2 VERSION OF THE DATA INTERFACE IMPLEMENTED

The version of the data interface implemented at the moment of publication of this document is version 4.1.

The information about installation and time validity of new versions will always be published on https://eet.gov.cz.

2.3 PARALLEL OPERATION OF INTERFACE VERSIONS

Parallel operation of the current version and the previous version of the interface is supported in the Playground environment to support smooth migration of clients to the new major interface version. This applies to all versions from 4.0 upwards.

2.4 TAXPAYER'S CERTIFICATES AND TEST EIČ

A set of test certificates is prepared and published together with this document for use during development tests. Each test certificate contains pre-configured EIČ values, appointed by the Financial Administration exclusively for use at PG.

Test certificates are shared among all testing subjects.

The description of the test certificates and the relevant CA parameters is in the next chapter.

3 CERTIFICATES

3.1 TAXPAYER'S CERTIFICATES – EET CA 2 PLAYGROUND

3.1.1 Certification authority

For the purposes of the Playground, a root certificate and an issuer certificate will be issued, designated as "EET CA 2 Playground".

The set of test certificates consists of three certificates issued for reserved test EIČ values. These certificates are shared among all testing subjects.

3.1.2 Root certificate

- **CN =** playground EETv2 NCA Root CA RSA MM/YYYY
- **O =** Správa státních služeb vytvářejících důvěru
- **organizationIdentifier =** NTRCZ-19122063
- **C =** CZ
- **Key algorithm =** RSA 4096 bits
- **Signature algorithm =** sha256WithRSAEncryption
- **Validity =** 10 years

The certificate is published in the binary DER format as file ca_eet-root_cert-playground.crt.

3.1.3 Issuer certificate

- **CN =** playground EETv2 NCA SubCA RSA MM/YYYY
- **O =** Správa státních služeb vytvářejících důvěru
- **organizationIdentifier =** NTRCZ-19122063
- **C =** CZ
- **Key algorithm =** RSA 2048 bits
- **Signature algorithm =** sha256WithRSAEncryption
- **Validity =** 4 years

The issuer certificate is published in the binary DER format as file ca_eet-sub_cert-playground.crt.

3.1.4 CRL

For the Playground no CRL will be issued — the CA EET is not operated for the Playground.

3.1.5 Cash-register certificate profile

- **CN =** Taxpayer EIČ
- **description (optional) =** note entered by the taxpayer, max. 64 characters
- **C =** CZ
- **Key algorithm =** RSA 2048 bits
- **Signature algorithm =** sha256WithRSAEncryption
- **Validity =** 366 days
- **KeyUsage (critical) =** digitalSignature, nonRepudiation
- **Policy (OID) =** OID 1.3.6.1.4.1.23624.10.1.71.1.1 (PREPROD/Playground)
- **userNotice =** "Toto je cert pouze pro testování EET2" ("This is a cert for EET2 testing only")

3.1.6 Test certificate – natural person with RČ, EIČ CZ8551015704

- **Description =** fyzicka osoba
- **CN =** CZ8551015704
- **C =** CZ

The certificate and the private key are published in the PKCS#12/PFX format, file CA_EET-Playground-CZ8551015704.p12. The PKCS#12 password is 8 characters, mandatorily containing uppercase and lowercase letters and digits — the specific password is delivered together with the file.

3.1.7 Test certificate – legal entity with IČ, EIČ CZ00000019

- **Description =** pravnicka osoba
- **CN =** CZ00000019
- **C =** CZ

The certificate and the private key are published in the PKCS#12/PFX format, file CA_EET-Playground-CZ00000019.p12.

3.1.8 Test certificate – taxpayer with VČP, EIČ CZ683555118

- **Description =** cislo platce
- **CN =** CZ683555118
- **C =** CZ

The certificate and the private key are published in the PKCS#12/PFX format, file CA_EET-Playground-CZ683555118.p12.

3.2 SSL CERTIFICATE

HTTPS connections to the playground (pg.trzbyeet.gov.cz) are secured with an SSL certificate from a trusted commercial certification authority.

Specific SSL certificate issuer: Digicert.

Certificate type EV.

Use of the HTTPS protocol is mandatory, without client certificate authentication at the TLS layer. Supported TLS versions are TLS 1.2 and higher.

3.3 SIGNING CERTIFICATE

A system certificate is used for signing acknowledgement data messages from the certification authority:

C = CZ
2.5.4.97 = NTRCZ-26439395
O = První certifikační autorita, a.s.
CN = I.CA Public CA/RSA 06/2022

Entity (verification that the confirmation message was signed by the GFŘ):

CN=NEOSTRE - playground prostredi EET
C=CZ
O=Generální finanční ředitelství
organizationIdentifier=NTRCZ-72080043

OID 1.3.6.1.4.1.23624.10.1.71.1.1

I. CA authority certificates are available here: https://www.ica.cz/korenove-certifikaty

- CN: 100000002 a 100001063

4 OPERATIONAL PARAMETERS

4.1 SERVICE TIME

PG service time is 24x7, 8x5 availability. The maintenance window is typically every Thursday between 20:00 and 06:00.

The total annual availability of the PG environment is set to 99.5 %.

Minimum acceptable sale acceptance date and time on the playground version 4: 01.07.2026, 00:00.

4.2 SUPPORT

PG operation support is provided through the e-mail address epodpora@fs.gov.cz, or the contact form at https://eet.gov.cz.
